

HOME CHALLENGE

Perfect Turning

Level: 2

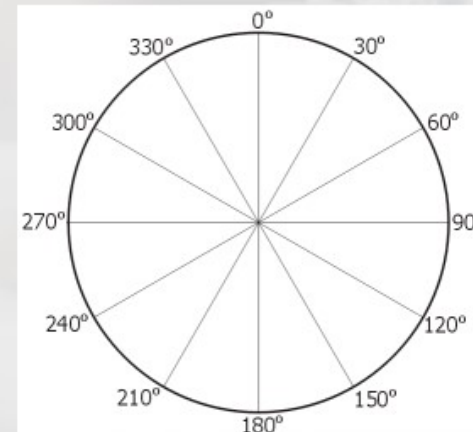

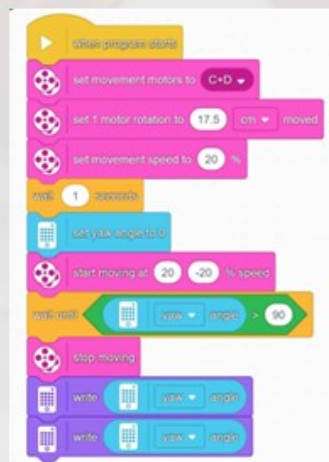

Blocks using: yaw angle

Sensor: Gyro

Mat using: none

Description:

Make perfect 90 degrees turn by using gyro sensor. This is extremely useful when you can not use line follower or in a condition you don't have extra port to install additional sensor to navigate. A demo program is show below. Try to make different turns by using the gyro sensor. And you can combine with other movement like marking a perfect square using the gyro sensor.
